An exchange says: In Fleming county there is a couple, both of whom are 80 years of age. They have kept house for thirty years, and never until last week possessed a cooking stove. They have always cooked over an old-fashioned fire-place with pot-boiler and have done their baking in a "Dutch" oven.

On Sunday morning the residents in the neighborhood of Sixth and Limestone streets were startled by the report of something like a cannon. The latest investigation it proved to be George Strawder. He was only up on the roof of his house shooting at a black snake 6 feet 7 inches in length. George is a good marksman, having shot inside a barn when the door was open, and of course when he took the gun the snake, tree and several bowlers went out of the scrape. But he will only notify the people the next time he goes to shoot there will be some moving done.

Dr. M. J. Davis is a prominent physician of Lewis, Cass county, Iowa, and has been actively engaged in the practice of medicine at that place for the past thirty-five years. On the 26th of May, while in Des Moines, en route to Chicago, he was suddenly taken with an attack of diarrhea. Having sold Chamberlain's Colic, Cholera and Diarrhoea Remedy for the past seventeen years, and knowing its reliability, he procured a 25-cent bottle, two doses of which completely cured him. The excitement and change of water and diet incident to traveling often produce a diarrhea. Every one should procure a bottle of this remedy before leaving home. For sale by Theo. Poyer, Druggist.

The Boston tea other day paid ten cents a bushel for slack. Some idea of the profit of steamboating just now can be had by the statement that at this rate her fuel supply would cost a little over \$500 a week.

Be careful, farmers. R. A. Waller of near Uniontown sowed 11 acres of ground in timothy, and it came up thick and uniform but metamorphosed into just that number of acres of "cheat." There was not a head of timothy in the whole field.

The officers of one of our city churches are seriously considering a plan whereby the loading of young men in the lobby of the church can be avoided. It has been suggested that a slate be hung in the vestibule so that the young ladies of the city may register before entering the place of worship. The young men who are in the habit of coming around just before the close of service could then consult the slate instead of continually annoying those inside by opening the doors to ascertain if the girls are inside.

A STREAK OF LUCK

Was all That Saved the Residence of Mrs. Abner Hord Near Helena.

Last Friday evening as Miss Mae Hord was entertaining a number of her most intimate friends an accident happened that came near causing the loss of the beautiful home with its contents.

One of the young ladies went to pass the piano lamp and in some manner had caught an ornament in her dress, which caught in the lace on the shade of the lamp, overturning it, breaking the lamp, spilling the oil out on the carpet, which ignited and in a moment all was confusion.

All the young ladies present beat a hasty retreat, but the gallant young men rushed to the scene, and with the aid of several heavy rugs, the piano cover, sofa pillow and their patient leather shoes succeeded in extinguishing the flames, not, however, until the carpet had been ruined and all the ornaments in the room, together with the piano cover and sofa pillow, while several of the young men had to replenish their stock of shoes.

The loss is considerable, but the carpet was insured, which, of course, he received by the insurance company. It would have been very hard indeed had Mrs. Hord lost her beautiful home, and we would suggest the next time the young people have a social gathering it will be out on the lawn, using the beautiful beauty of the country for a covering, and then there will be no possibility of the above accident.

Henry C. Banel is seriously ill at his home on West Second street, and fears are entertained for his recovery.

PRECINCT MEETINGS.

They Were Held Yesterday Afternoon Throughout the County.

Yesterday was the day, 9 o'clock p. m. the hour the Republicans had set apart to hold conventions in each Precinct in the county to nominate delegates to attend the County Convention in this city Saturday afternoon, and it was a good day for the Republicans too.

At nearly every Precinct in the county there were large crowds who were interested in their respective candidates.

We have never before seen so much interest manifested on the part of Republicans, which showed plainly that they wanted something besides "clover" to make them feel a little more the condition in which they are now in.

In the First Ward the meeting was called to order by Sam T. Hickman, who was made Permanent Chairman, and Byron Hogg was made Secretary. The delegates—all good Republicans of the Precinct—were instructed to vote for Cochran, and Hon. William H. Cox was selected as County Committeeman.

The Second Ward elected R. A. Cochran, Sr., as Chairman, and Newton Cooper, Thomas Graves and Fred Bierhower as delegates, to go unopposed.

The Third Ward elected A. M. J. Cochran as Chairman, Charles Broese Secretary and George L. Cox as delegate, to go unopposed.

The Fourth Ward Julia J. Brown was chosen Chairman, George F. Broese Secretary and W. T. Cole, Chris Brown, John Farley, John T. Short, Charles Harris and Dr. T. H. Smith as delegates, to go unopposed.

The Fifth Ward elected W. E. Stallcup Chairman, Eugene Collins Secretary and J. I. Salsbury, Delmore Daulton and James Purnell as delegates, who were instructed for Mathews, and W. E. Stallcup was chosen Committeeman.

The Sixth Ward elected Orlando P. Cox Chairman, J. Will Clinger Secretary and Polk Hicke and Orlando P. Cox as delegates, to vote for Clinger and Cochran.

Plugtown instructed for Cochran and Hutchins.

Oats are generally reported to be poor, though a few late planted fields will yield a fair crop. The condition of the crop is practically the same as that of wheat.

The present prospect for tobacco cannot be said to be promising. The dry weather has prevented the work of transplanting and the plants are rapidly becoming too large to set. Only about half the crop is in the ground, and warm rains are needed to put the soil in condition to permit of the planting of the remainder. In some localities the plants are reported to have been killed by the recent frosts.

Early help land is being plowed over and rows in many places, but late help was injured but very little by the cold.

Gardens have suffered seriously, and all of the tender crops, such as melons, cucumbers and sweet potatoes, are killed in many sections. The smaller fruits, except strawberries, have also been seriously damaged.

Meadows are only fair, but will be improved with rain.
